**(54) PRODUCTION OF STRONGLY ACIDIC WATER WITH FOSSIL EARTH**

(57)Abstract:

**PROBLEM TO BE SOLVED:** To provide a production method of strongly acidic water in a large amount with fossil earth for reforming water such as city water without performing a chemical treatment or an electrolysis, or the like, at a low cost by using naturally produced fossil earth.

**SOLUTION:** City water 31 is charged into a water tank 30 and also about 10% fossil earth B with respect to city water 31 is charged into the city water 31, and about 6000-10,000 gauss magnetic lines of force are applied to the city water 31 and also the city water 31 is stirred in the water tank 30, thus the city water 31 is reformed to strongly acidic water.
